

SwissStop CATALYST DISC ROTOR

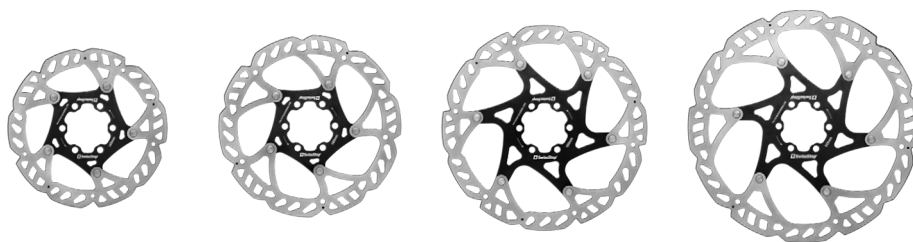

**ACCEPTED BY THE UCI
FOR ROAD COMPETITION**

CATALYST *disc rotor*

On January 1st, 2017, the Union Cyclist Internationale (UCI) recommenced the trial of disc brakes in road cycling competition. To be acceptable for use the outer perimeter of disc rotors must not contain any 90 degree edges.

The outer perimeter the Catalyst disc rotor has rounded edges. The SwissStop Catalyst has been reviewed by the UCI technical department and is considered acceptable for use in road competition. This includes all four available rotor sizes: 140 mm, 160 mm, 180 mm and 203 mm.

Ø 140 mm

Ø 160 mm

Ø 180 mm

Ø 203 mm

WARNING

Please ensure the Catalyst Disc Rotor meets the compatibility and warranty requirements of all components in your brake system.
